

Laboratory Analytes Reported by Biomonitoring California

Materials for March 2019 Scientific Guidance Panel Meeting

Analytes, grouped by lab panel ¹	Sample type	Current studies ²
Environmental phenols Benzophenone-3 Bisphenol A Bisphenol F Bisphenol S Parabens – butyl, ethyl, methyl, propyl Triclocarban Triclosan	Urine	CARE Study: LA (Region 1) Under consideration for Region 2 ³ PPVS Laboratory Pilot Study
Metals Antimony (u)* Arsenic (u) Cadmium (b, u)* Cobalt (u) Lead (b)* Manganese (b, u)* Mercury (b, u)* Molybdenum (u) Thallium (u) Uranium (u)	Blood (b) and/or urine (u)	CARE Study NCCF Study (*Partial set)
Arsenic speciation Arsenic (V) acid Arsenobetaine Arsenocholine Arsenous (III) acid Dimethylarsinic acid Monomethylarsonic acid	Urine	CARE Study

¹ Includes only analytes that are currently being reported, or would be reported if the lab panel were to be run in a future study. This is a partial list of Biomonitoring California laboratory capability.

² Includes current Biomonitoring California studies and lab collaborations that are measuring these analytes. Refer to page 4 for study abbreviations.

³ Region 2 includes Mono, Inyo, San Bernardino, Riverside, and Imperial counties.

Analytes, grouped by lab panel ¹	Sample type	Current studies ²
Perchlorate	Urine	--
Phthalate metabolites Mono-(2-ethyl-5-carboxypentyl) phthalate Mono-(3-carboxypropyl) phthalate Mono-benzyl phthalate Mono-cyclohexyl phthalate Mono-ethyl phthalate Mono-n-butyl phthalate Mono-isobutyl phthalate Mono-(2-ethyl-5-hydroxyhexyl) phthalate Mono-(2-ethyl-5-oxohexyl) phthalate Mono-(2-ethylhexyl) phthalate	Urine	--
Volatile organic compound (VOC) metabolites Method ⁵ under development, funded by Proposition 99	Urine	--

Abbreviations:

CARE Study = California Regional Exposure Study
 BDE = Brominated diphenyl ether
 DCCA = 3-(2,2-Dichlorovinyl)-2,2-dimethylcyclopropane carboxylic acid
 DDE = Dichlorodiphenyldichloroethene
 DDT = Dichlorodiphenyltrichloroethane
 ECHO⁶ = Environmental Influences on Child Health Outcomes
 FREES = Foam Replacement Environmental Exposure Study
 HCH = Hexachlorocyclohexane
 IMPY = 2-Isopropyl-4-methyl-6-hydroxypyrimidine
 LA = Los Angeles County
 MACOTA Study⁷ = Maternal Cotinine and Autism Study

MAMAS = Measuring Analytes in Maternal Archived Samples
 NCFE Study = Northern California Firefighter Study
 OCPs = Organochlorine pesticides
 OP = Organophosphate
 OPFRs = Organophosphate flame retardants
 PAHs = Polycyclic aromatic hydrocarbons
 PBDEs = Polybrominated diphenyl ethers
 PCBs = Polychlorinated biphenyls
 PFASs = Perfluoroalkyl and polyfluoroalkyl substances
 PPVS⁸ = Phenols & Phthalates Validation Study
 TCPy = 3,5,6-Trichloro-2-pyridinol

⁶ Laboratory collaboration with University of California San Francisco and University of Illinois Urbana-Champaign. Samples from pediatric cohorts UG3/UH3.

⁷ Laboratory collaboration with Gayle Windham at the California Department of Public Health.

⁸ Laboratory collaboration with San Jose State University.

Description of MAMAS

Maternal serum samples from pregnant women are collected by regional laboratories as a part of the State’s Genetic Disease Screening Program (GDSP). Biomonitoring California has obtained three sets of samples from GDSP, selected across racial groups (White, Hispanic, Black, and Asian) and region (see table below). Analytes being measured include PFASs, PBDEs, PCBs, and OCPs.

MAMAS-1 (n=460) <i>2012 samples</i>	MAMAS-2 (n=540) <i>2015 samples</i>	MAMAS-3 (n=300) <i>2015-2016 samples</i>
